D-Link Powerline Slow Speed Question.

2020/04/10

Hi I have high speed internet but have been using a really old modem for past 8+ years or so that only allows me to achieve around 25mbps up speeds standing next to the router. When I plug the Powerline into another room I get roughly the same speed but nothing close to what my ISP suggest of up to 100MBPS. My query is does my old modem/router affect the D-Link Powerlines ability to achieve higher speeds? Or does the Powerline work only with the electrical circuits of my house and the modem/router specs have nothing to do with the final speeds? If I buy a newer router eg. Netgear Nighthawk will that increase the Powerlines speed or no difference? I have the older PowerLine AV500 btw.Thank you.
